

## **Telecommunications Premium Services- 2/95 to 9/95**

Senior software developer for a new company that provides digital voice response systems to the cellular industry. Main responsibilities were with ProC Oracle based reports, billing, and analysis software. This software runs on Sun OS and HP/UX computers and interfaces with SCO boxes that contain the Dialogic voice hardware. It replaced some previously existing Oraperl reports but was much less code and 20 times faster. Also performed analysis using Erlang calculations and participated in studies of middle ware products such as Tuxedo and Top End.
