

ATP Inc. - 10/02 to 1/03

Worked on an Army subcontract to CSC developing wireless (802.11) software for handheld computers running MS CE. This project was called Land Warrior and involved parsing XML and other TOC (Table of contents) files of DOD specifications and converting maps and geographic information into various formats including CDRG, JPG, BMP for visual display in the field with an easy user interface. Development languages include MS Visual C++, Java, VB Script.
