

MindTrust Consulting - 3/03 to 8/03

Consulting to Kraft/Nabisco doing QA of Oracle sql code to support the implementation of a new Manugistics package. Developed using perl and Sybase, ISQL, management reports which output Microsoft Excel spreadsheets detailing the running of batch programs on AIX servers which are scheduled using ControlM. Developed similar management reports that monitor Oracle DBMS performance statistics and summarize daily results in another Excel spreadsheet with graphs. Also involved in support phase of an existing JP Edwards Schedule X application that uses data feeds to and from manufacturing facilities using a Linear Program to produce optimized schedules.
